

Application:

Aluminum Dust

Collector Model:

LP-2

Air Volume:

1,000 CFM

Contact Scientific Dust Collectors for more information. Ask for Application Number 020506.

Application Notes:

Bodycote is a company that specializes in heat treating and material processing. They have 70 plants in North America. This process uses a tumbler to remove burns and other deformities from aluminum parts. General nuisance dust from this tumbling process created a health concern and a housekeeping problem. The LP-2 with explosion vent resolved their problem.
