

**Application:**

Sandblasting

Collector Model:

SPJ-108-X4B8

Air Volume:

15,000 ACFM

180 °F Maximum

Air-to-Cloth Ratio:

14.7 to 1

Contact Scientific Dust Collectors for more information. Ask for Application Number 049801.

Application Notes:

The United States Marine Corps Logistics Base uses a Scientific Dust Collector at its tank refinishing facility in Albany, GA. The air is exhausted through a small muffler and stack assembly.

The unit collects various abrasive dusts. Some of the dry particulate in the dust is the specialized paint used to protect the tank and its crew from a wide variety of elements, including germ warfare. 8' singed polyester bags are used in the collector as the filter cloth.
