Application Number 280412.

Application Notes:

The Egging Company in Iowa is a component supplier to Caterpillar and John Deere. They specialize in custom metal fabrication. Previously, they had a cartridge style dust collector on a blast cabinet that frequently plugged, resulting in down time, low air flow and substantial maintenance. After installing a Scientific baghouse, air flow has increased and maintenance was greatly reduced. Discharge from clean air side is measured at less than 0.2 mg/m^3 .
