

Application:

Inert Carbon

Collector Model:

SPJ-384-4T10

Air Volume:

40,000

Air-to-Cloth Ratio:

8.8 to 1

Contact Scientific Dust Collectors for more information. Ask for Application Number 030101.

Application Notes:

Columbian Chemical is a large industrial laboratory and mechanical design company in Marietta, GA. In 1997, they built a new 36,000 square foot lab building. With their new research and development facility, Columbian required a collector to pull inert carbon from their labs.

To do the job of collecting the fine carbon dust, they chose a SPJ-384-4T10 Scientific Dust Collector with (384) 10 foot polyester bags. The collector has now been operating trouble free for two years and as expected is still using its original bags.
