

Application:

Mixing Industrial Powders

Collector Model:

SL3-18

Air Volume:

9,000 CFM

Contact Scientific Dust Collectors for more information. Ask for Application Number 100008.

Application Notes:

Avery Dennison Corporation is a worldwide manufacturer of self-adhesive base materials labels, tapes, office products, and specialty chemical adhesives.

This is their performance films division where they make fine colored film for automotive applications. The plastic like sheet is applied to molded pieces like bumpers and side mirrors to match the color of the body panels.

Over one hundred different chemicals are used in the manufacture of these films. The dust collector keeps the mixing room and the mixers under negative pressure while the powders are being added to the tanks for mixing into solution.
